AUTHOR Hussong, Mary Ann, Comp.; And Others
TITLE 16 PF Research Bibliography: 1971-1976.
INSTITUTION Institute for Personality and Ability Testing, Champaign, IL.
PUB DATE 7 Aug 77
NOTE 33p.
PUB TYPE Reference Materials - Bibliographies (131)

EDRS PRICE MF01/PC02 Plus Postage.
DESCRIPTORS Doctoral Dissertations; *Educational Research; *Personality Measures; *Personality Traits
IDENTIFIERS *Sixteen Personality Factor Questionnaire

ABSTRACT

This bibliography contains a comprehensive listing of research studies and dissertations related to the Sixteen Personality Factor (16 PF). It is the third part in the series of reference works begun by the 16 PF Handbook (1970) and supplemented by the 16 PF Manual (1972). The collection spans primarily the years 1971-1976. Several references to work conducted before 1971 and some in 1977 are included. It presents 688 citations not previously cataloged in any publications of the Institute for Personality and Ability Testing. The bibliography is fully cross-indexed, drawing heavily from the indexing system employed by the American Psychological Association in publications such as Psychological Abstracts. Every citation is followed by a code which indicates the source where the abstract of the document can be found. (JAZ)

This Bibliography contains a comprehensive listing of research studies and dissertations related to the 16 PF. It forms the third part in the series of reference works begun by the 16 PF *Handbook* (1970) and supplemented by the 16 PF *Manual* (1972). As the title indicates, this collection spans primarily the years 1971-1976. Several references to work conducted prior to 1971 which have come to our attention only recently have also been included. Similarly, this Bibliography contains a few citations for 1977 work. Overall, this book presents nearly 700 significant citations not previously catalogued in any IPAT publication. The two Buros' series, *Mental Measurements Yearbooks* and *Tests in Print* contain excellent evaluative bibliography and should be consulted by all test users wishing to deepen their familiarization with the 16 PF and related tests.

The present Bibliography is fully cross-indexed for maximum convenience, drawing heavily from the indexing system employed by the American Psychological Association in such publications as *Psychological Abstracts*. Whenever possible, we have followed the format established by Buros to provide the abstract citation for *Psychological Abstracts* (PA), *Dissertation Abstracts* (DA), or *Dissertation Abstracts International* (DAI). The notation PA 56:14265, for example, means that an abstract of the article may be found as number 14265 in volume 56 of *Psychological Abstracts*. The notation DAI 32:604B means that an abstract of the dissertation will be found on page 604 in volume 32, section B of *Dissertation Abstracts International*.

Finally, in order to update the collection of research reports dealing with the 16 PF and related tests, IPAT relies largely upon information from the testing public. We will appreciate receiving reprints of research reports of all types which contain data on these instruments. Furthermore, we would like to thank all those persons who have sent material in the past for helping to make this listing possible.
